

Visual™ Applications

Visual- Perceptible by the mind's eye. Able to be perceived as a picture in the mind rather than as an abstract idea. Piece of Illustrative material.

VISUAL™ has almost endless usage possibilities. If the designer can imagine it, VISUAL™ can provide it. VISUAL™ can capture photographs, graphics or patterns and preserve the integrity of the images for as long as the glass is in the building. Designers have complete freedom to customize any piece of glass, while retaining the laser-like precision of digital technology.

Amongst the applications VISUAL™ can be used:

- Partitions
- Wall Cladding
- Office Identifiers
- Back splashes
- Wayfinding Systems
- Architectural Graphics
- Signage
- Civic Design
- Pictograms
- Mapping
- Themed Environments
- Donor Walls
- And so much more!

VISUAL™ can be used on the interior or exterior and can handle weather and cleaning without any worry of damage.
